EXPERIMENT 9

Exploring AI-Assisted Features and Built-in Analytics (Zia) in Zoho Creator

Application: Loan Application & Pre-Screening Management

Aim

To explore the AI-assisted features (Zia) and the built-in analytics options available in Zoho Creator.

Procedure

1. Sign in to Zoho Creator. Take a screenshot of the home page showing the account name and the applications list. (Figure 1)

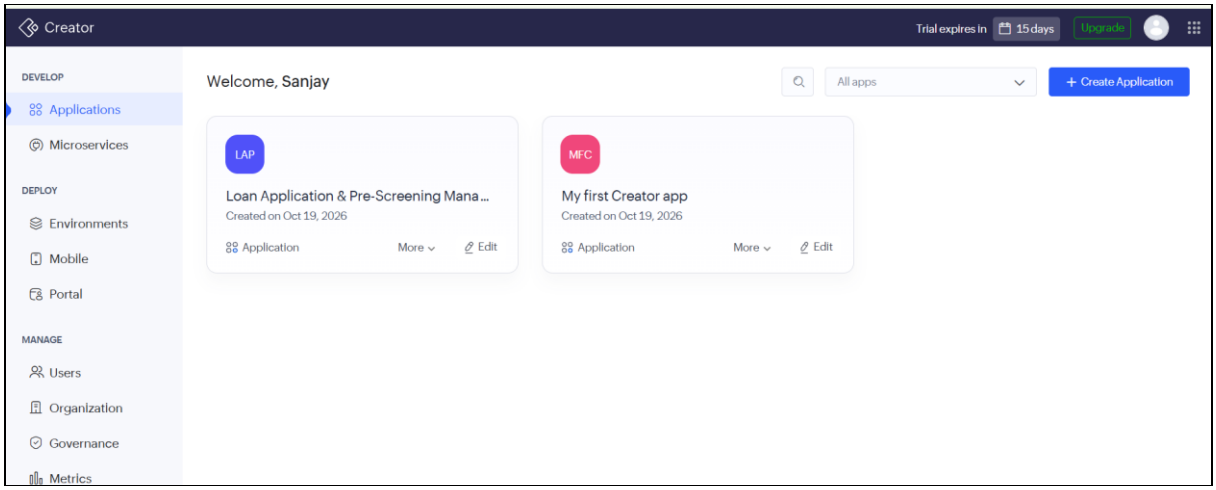

Figure 1: Zoho Creator home page

2. In the left menu click **Operations**, and then click **Zia**. Open the **Features** tab. Take a screenshot of the Feature access table. (Figure 2)

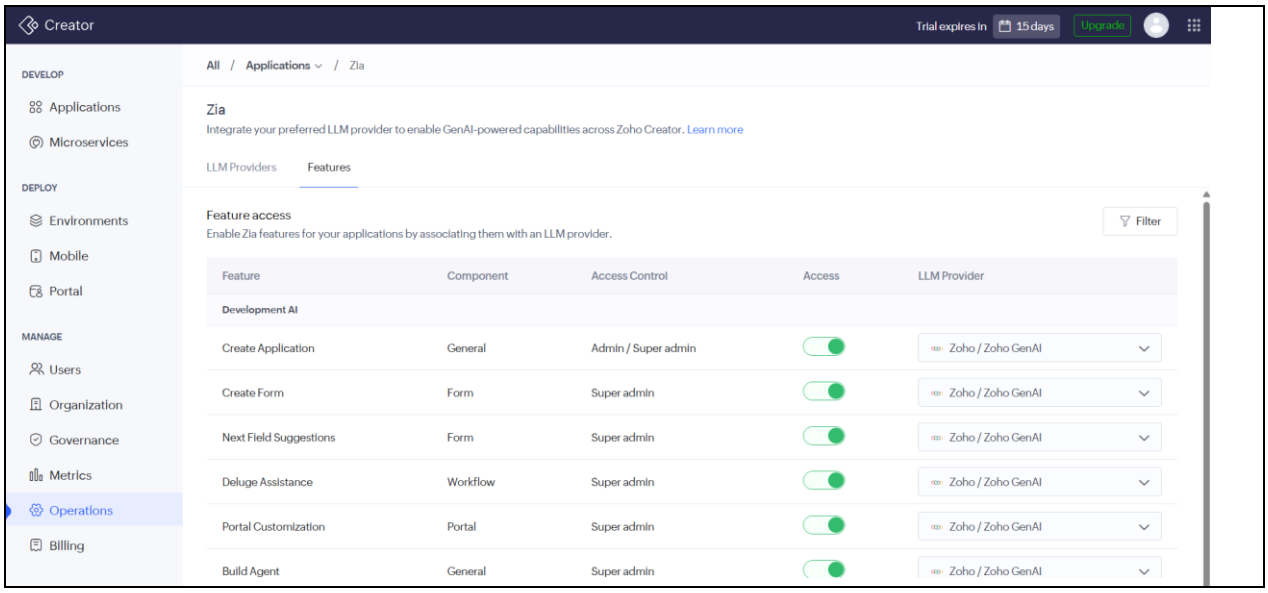

Figure 2: Zia feature access

3. Go to **Applications**, click **Create Application** and click **Create** next to **Create using Zia**. Take a screenshot of the screen or message that appears. Do not create an application. (Figure 3)

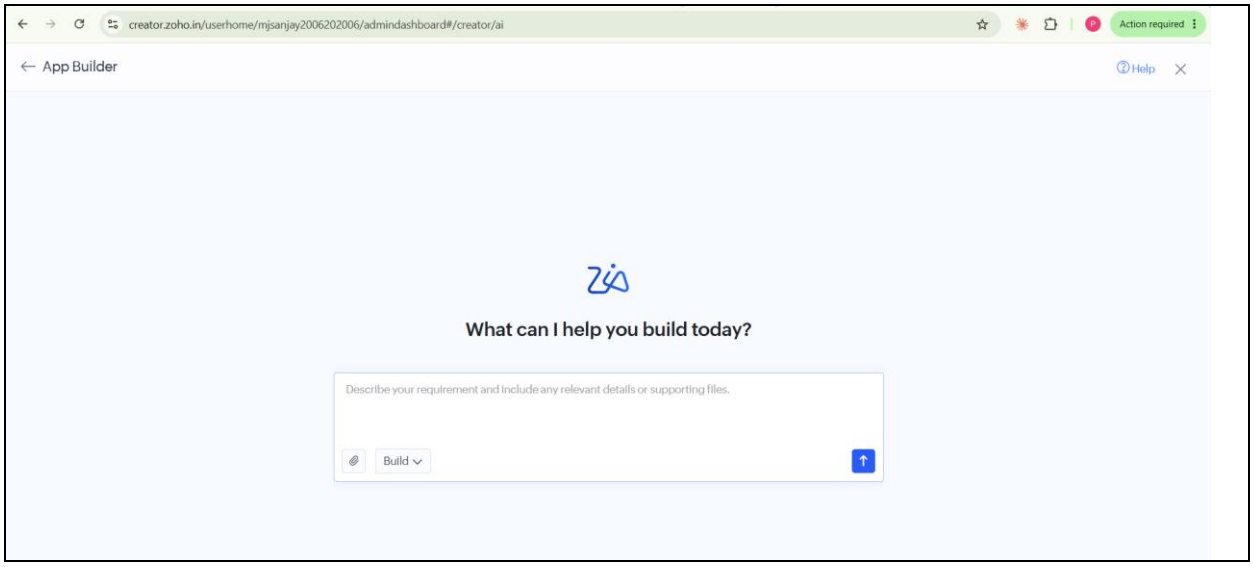

Figure 3: Create using Zia

4. Open the Loan Application & Pre-Screening Management application and click **Workflow**. Open the workflow **Send_To_Zoho_CRM**, click **Add New Action** and select **Deluge script**. Click the **Zia** icon at the top right of the editor. Take a screenshot of the Zia Assistant. (Figure 4)

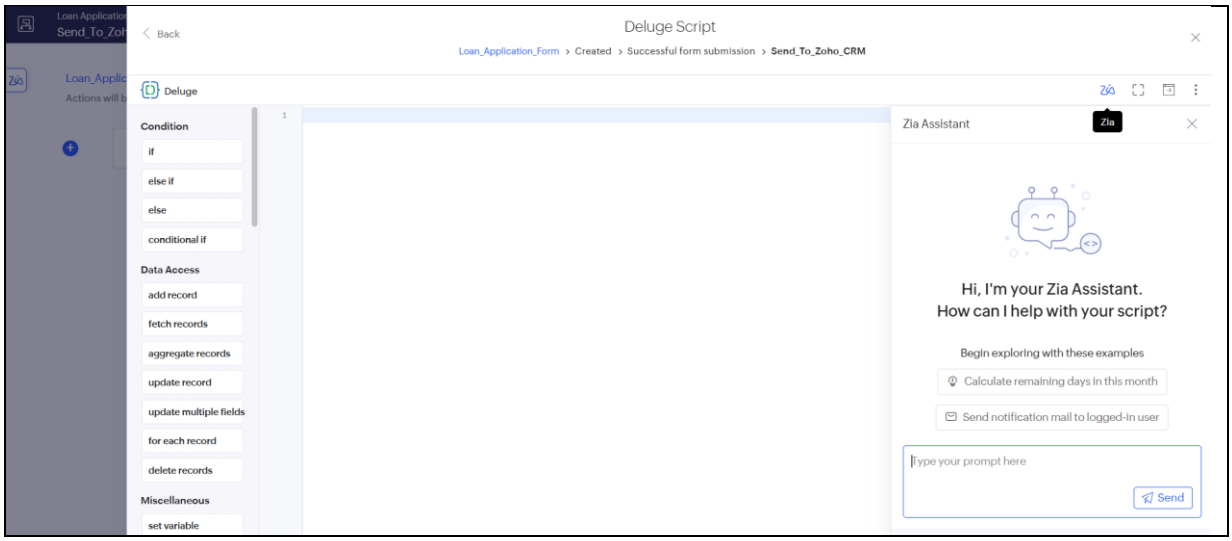

Figure 4: Zia Assistant in the Deluge editor

5. In the prompt box type **Send a notification mail to the logged-in user when a loan application is submitted** and click **Send**. Take a screenshot of the script that Zia writes. (Figure 5)

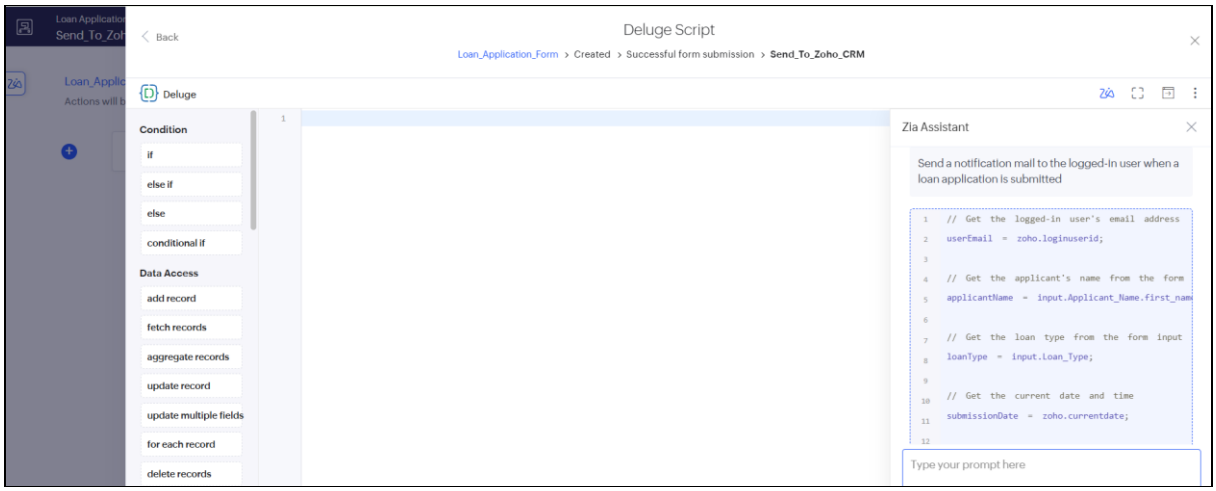

Figure 5: Deluge script written by Zia

6. Click **Cancel** to close the editor without adding the script. Open **Metrics** in the left menu of the Creator home page. Take a screenshot of the screen or message that appears. (Figure 6)

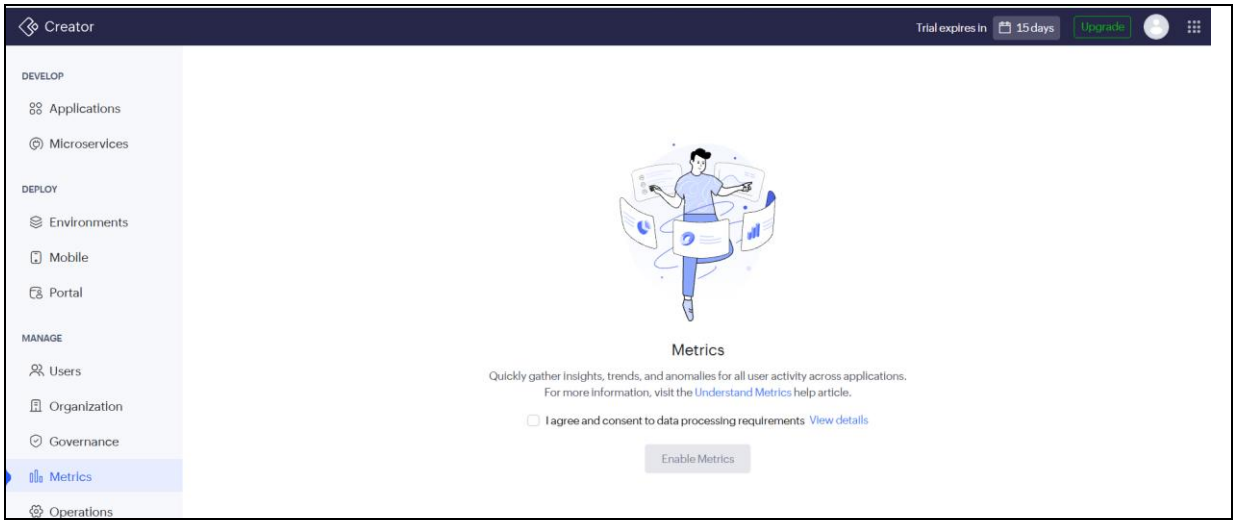

Figure 6: Metrics

Result

The Zia feature settings were viewed and the Zia Assistant in the Deluge editor was used. It generated a Deluge script for the prompt given. The script was not added to the workflow and nothing was saved, so the application was not changed. Create using Zia and Metrics were opened.
