EXPERIMENT 11

Deploying a Zoho Creator Application from Development to Production Environment

Application: Loan Application & Pre-Screening Management

Aim

To deploy the Loan Application & Pre-Screening Management application from the Development environment to the Stage and Production environments in Zoho Creator.

Procedure

1. Sign in to Zoho Creator. In the left menu of the home page, click **Environments** under Deploy. Take a screenshot of the Environments page. (Figure 1)

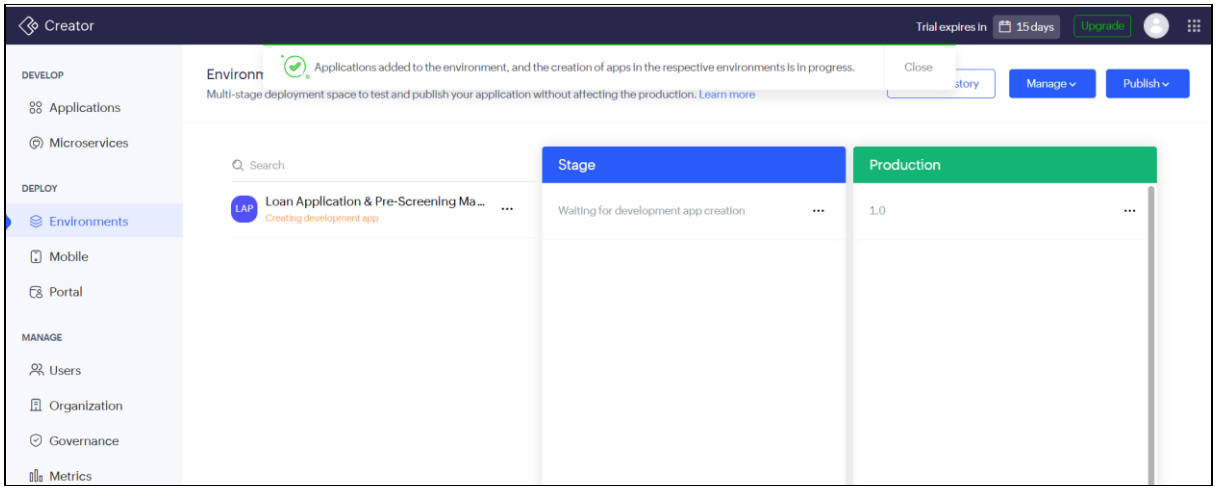

Figure 1: Environments page opened from the left menu

2. The application **Loan Application & Pre-Screening Management** is listed with the message **No changes available**. The Stage column shows version **1.0** and the Production column shows version **1.0**. Take a screenshot of this page. (Figure 2)

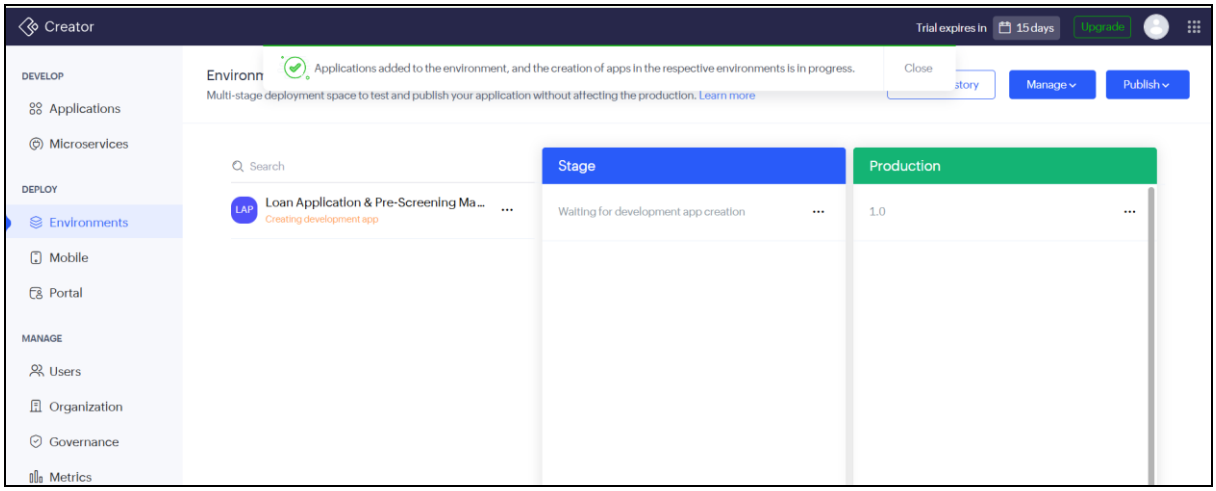

Figure 2: Application with Stage 1.0 and Production 1.0 on the Environments page

3. Click **Applications** in the left menu. On the application card, open the **Environment** drop-down. Take a screenshot showing the Development, Stage and Production environments. (Figure 3)

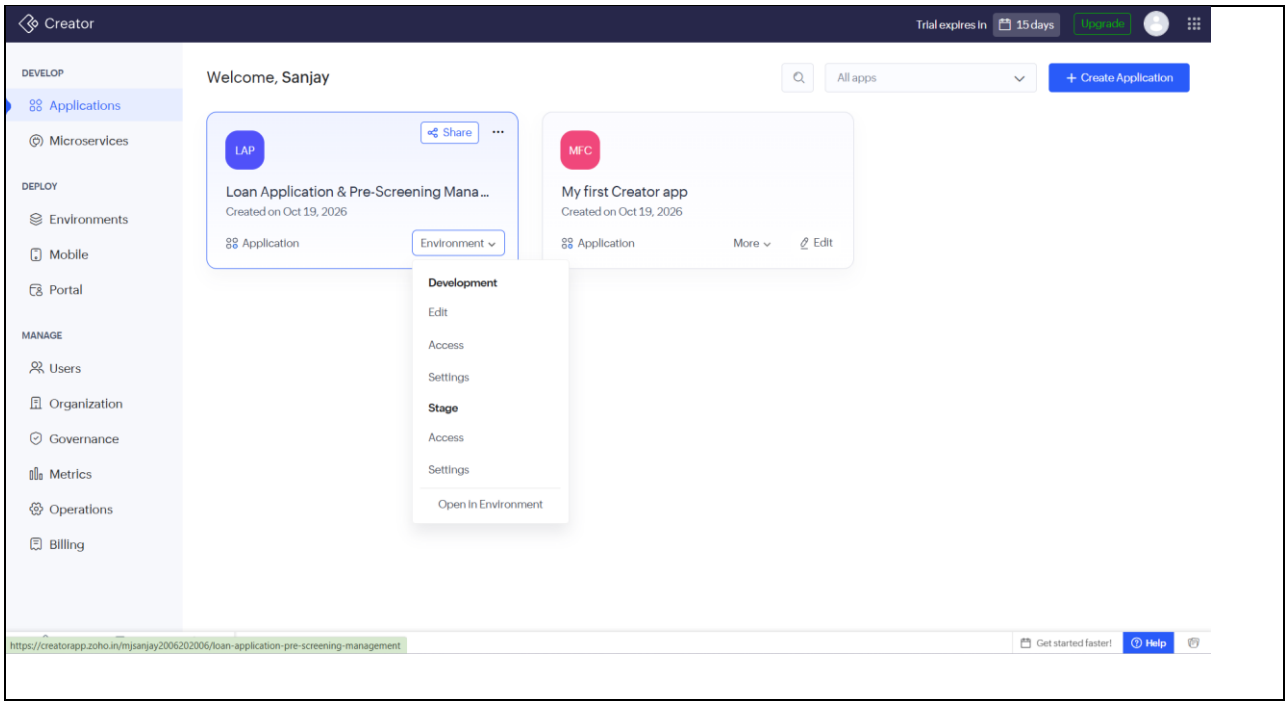

Figure 3: Environment drop-down on the application card

Result

The application Loan Application & Pre-Screening Management is available in the Stage and Production environments as version 1.0, and the Development, Stage and Production environments are listed on the application card. No Deploy option was shown because the page showed No changes available.
