EXPERIMENT 10

Applying Performance Optimization Techniques (Subforms and Query Tuning) to a Zoho Creator Application

Application: Loan Application & Pre-Screening Management

Aim

To apply performance optimization techniques, a subform for grouping related records and a tuned Deluge query that fetches only the required records, to the Loan Application & Pre-Screening Management application.

Procedure

Part A: Subform

1. Sign in to Zoho Creator, open the application **Loan Application & Pre-Screening Management** and click **Design**. Open the form **Loan_Application_Form** in the form builder. Take a screenshot of the form builder. (Figure 1)

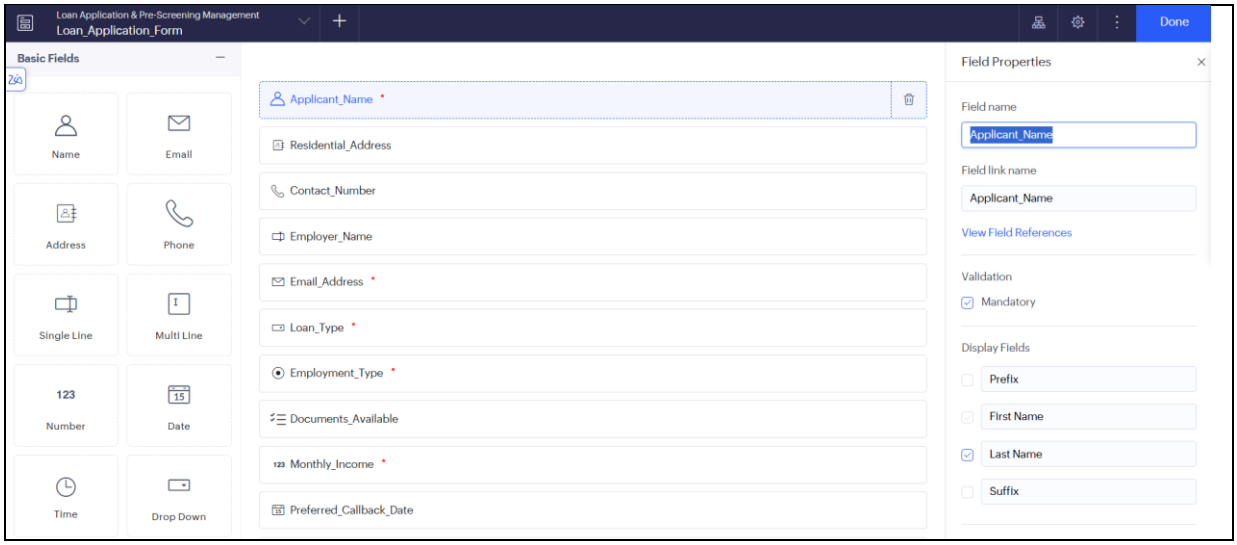

Figure 1: Form builder of Loan_Application_Form

2. In the field list on the left, scroll down to **SubForm**. It is below Date-Time, next to Lookup. Drag it onto the form below the last field. Take a screenshot. (Figure 2)

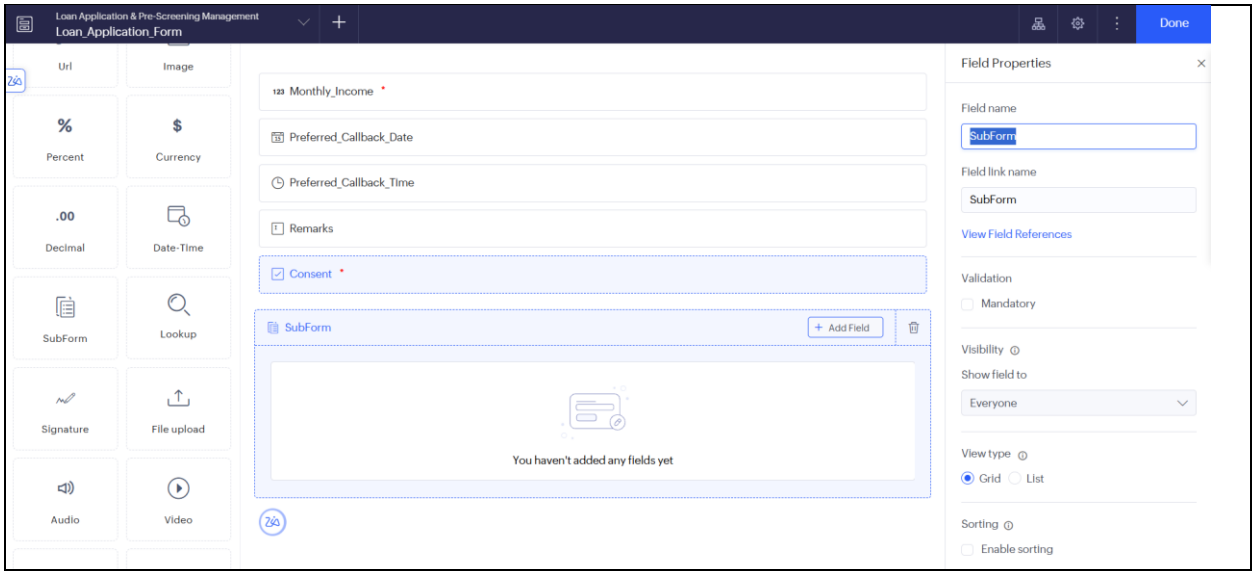

Figure 2: SubForm added to the form

3. Click the subform. In Field Properties on the right, change the Field name to **Previous_Loans**. Drag **Single Line** into the subform and name it **Lender_Name**. Drag **Number** into the subform and name it **Loan_Amount**. Take a screenshot showing the subform and its fields. (Figure 3)

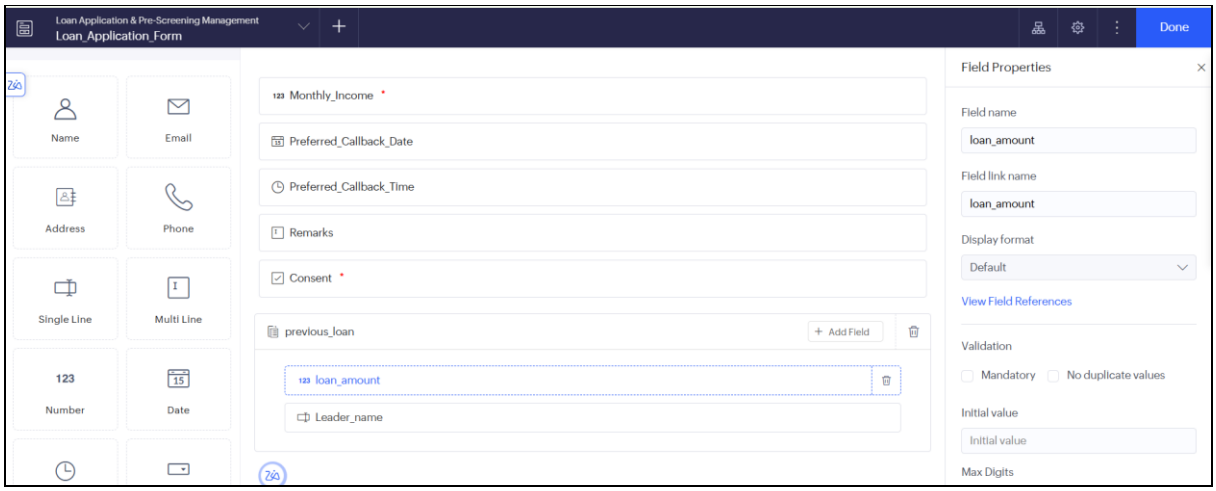

Figure 3: Previous_Loans subform with its fields

4. Click **Done** at the top right to save the form.

Part B: Tuned Deluge query

5. Go back to the application and click the **Workflow** tab. Open the workflow **Send_To_Zoho_CRM**, click **Add New Action**, select **Deluge script** and type the script below. The criteria Monthly_Income > 50000 fetches only the matching records, and range from 1 to 10 limits the result to 10 records instead of fetching all records.

```
applicants = Loan_Application_Form[Monthly_Income > 50000] range from 1 to 10;
```

info applicants.count();

6. Click **Save** and then **Done**. Take a screenshot of the saved script in the workflow. (Figure 4)

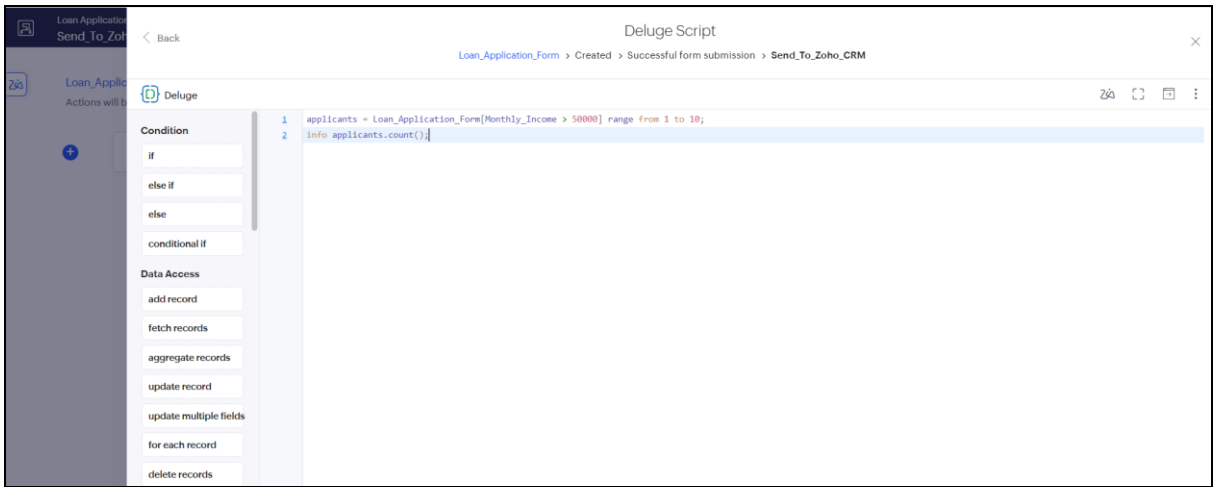

Figure 4: Tuned Deluge query saved in the workflow

Result

A subform named Previous_Loans with the fields Lender_Name and Loan_Amount was added to Loan_Application_Form. A Deluge query that fetches only the records with Monthly_Income greater than 50000, limited to 10 records, was added to the workflow Send_To_Zoho_CRM and saved.
