EXPERIMENT 5

Building Reports, Dashboards and Custom Pages in Zoho Creator

Application: Loan Application & Pre-Screening Management

Aim

To build a report, a dashboard and a custom page using the UI Builder in Zoho Creator for the Loan Application & Pre-Screening Management application.

Procedure

1. Open the application **Loan Application & Pre-Screening Management** in Zoho Creator and click the + button at the top. The Create New Component menu opens (Figure 1). A report named Loan_Application_Form Report was already created for Loan_Application_Form (Experiment 4).

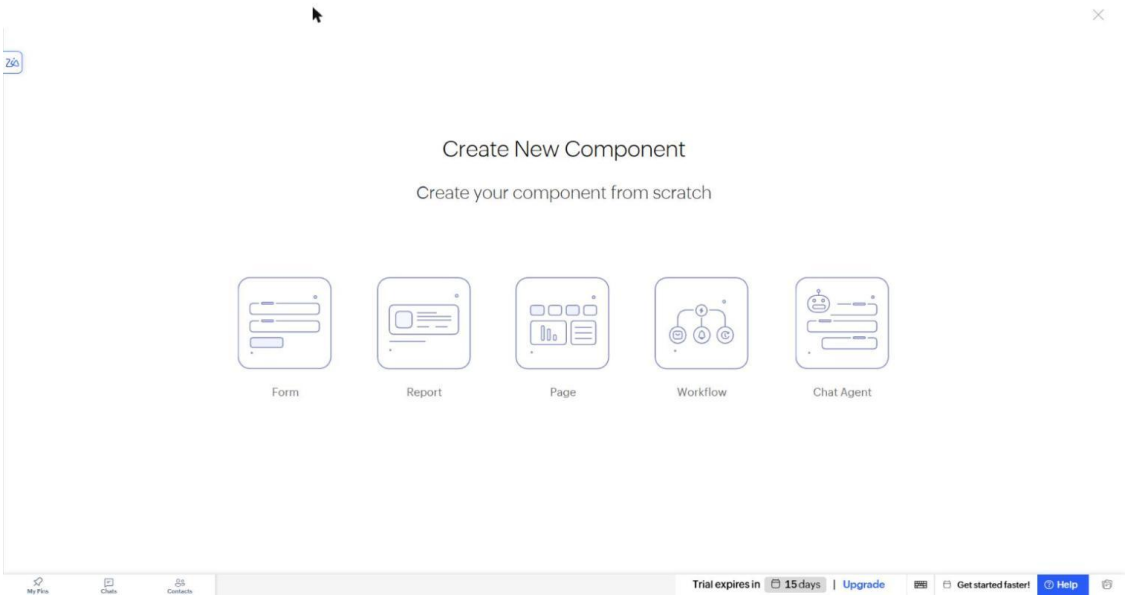

Figure 1: Create New Component menu

2. Choose **Page** and select **Blank**. In **Name page**, type **Loan_Dashboard** and click **Create Page** (Figure 2).

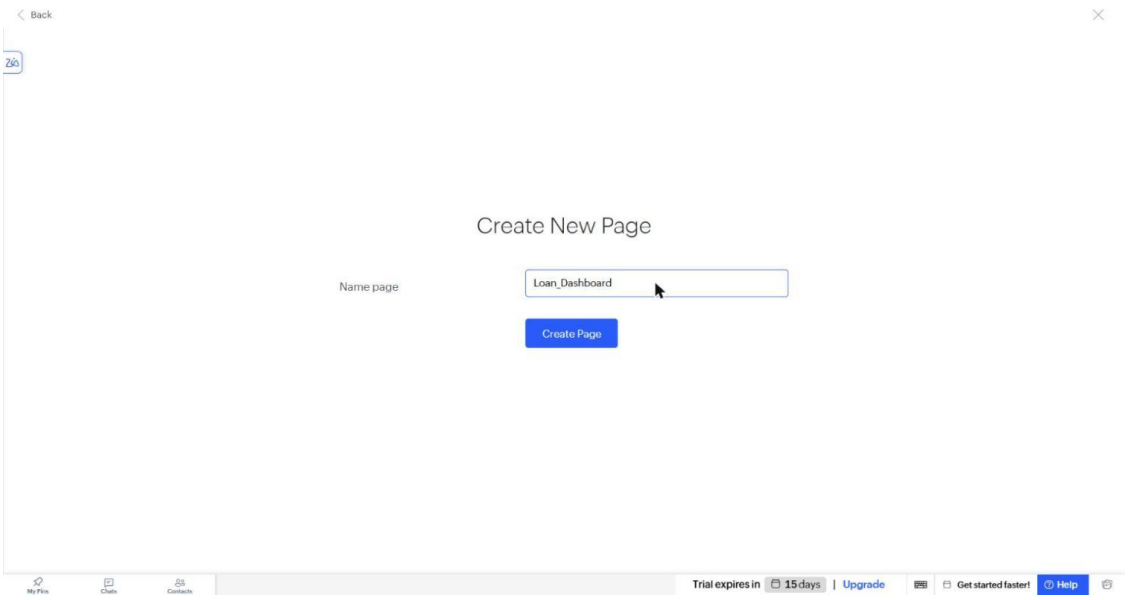

Figure 2: Page name entered

3. The blank page builder opens. The elements Panel, Board, Chart, Gauge, Search, Form, Report, Snippets, Button, Widgets and Viewer are listed on the left (Figure 3).

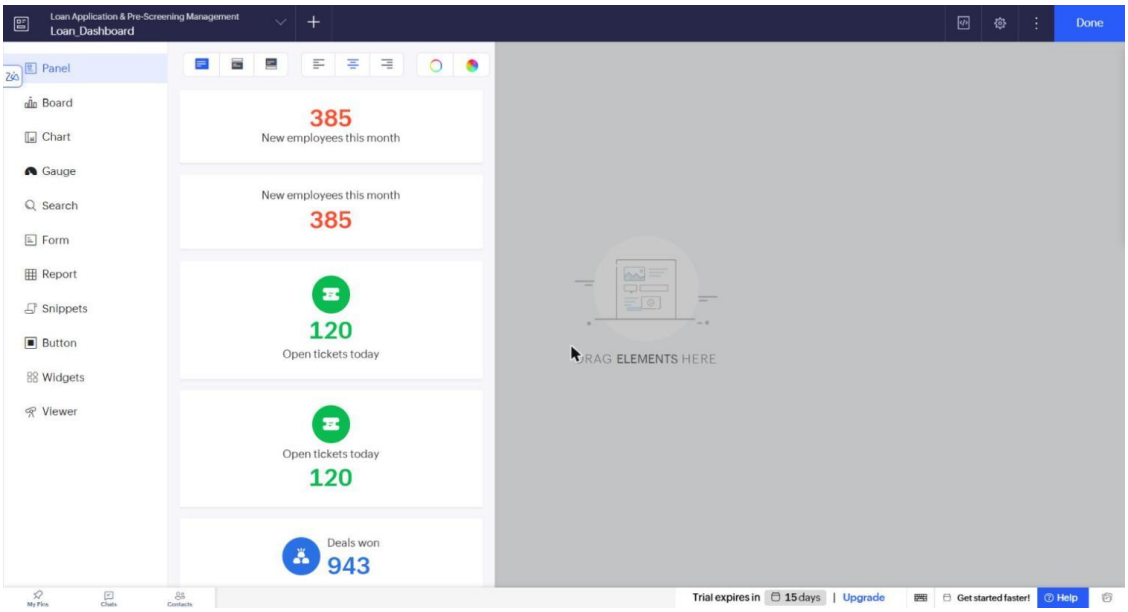

Figure 3: Blank page builder

4. Click **Chart** and drag the **Column** chart onto the page. In Chart Configuration, the form is Loan_Application_Form. For the X-axis, set Category to **Loan_Type** and Label to

Loan Type. For the Y-axis, use **Aggregate** with **Count of Contact_Number** and set Label to **Applications** (Figure 4). Click **Done**.

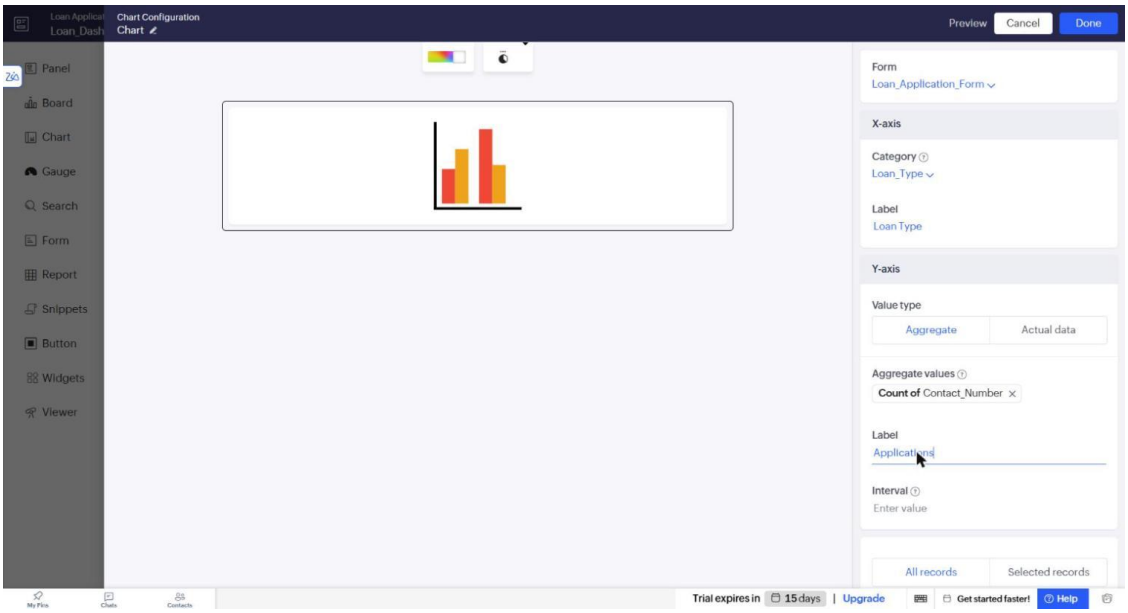

Figure 4: Chart configuration

5. The chart is placed on the page (Figure 5).

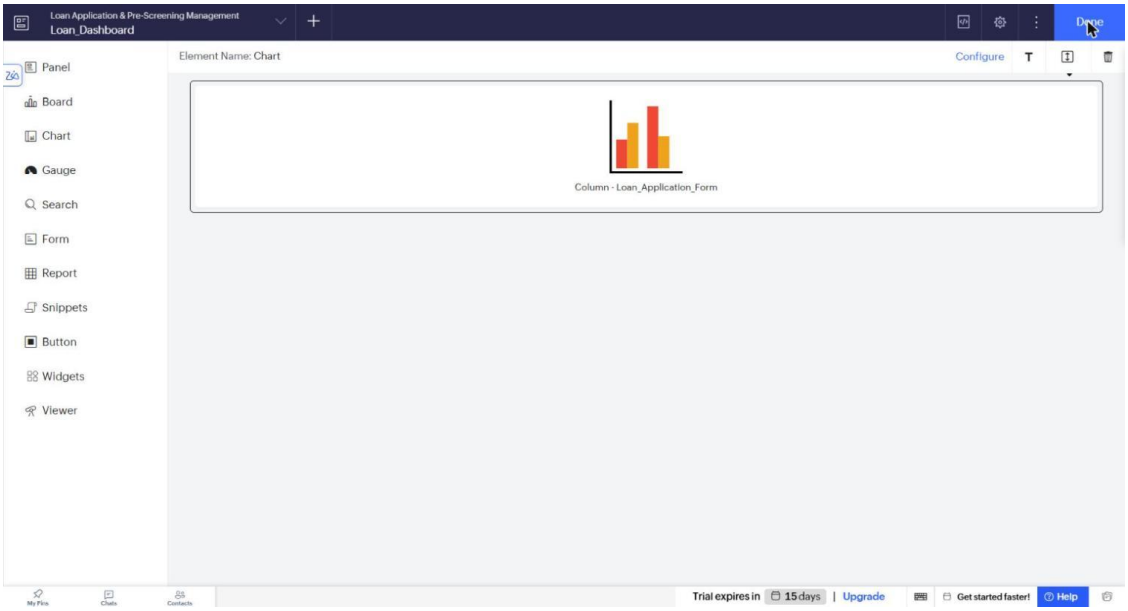

Figure 5: Page with the chart

6. Click **Report**, drag **Embed as report** below the chart, and select Loan_Application_Form Report. The embed properties are shown in Figure 6. Click **Done**.

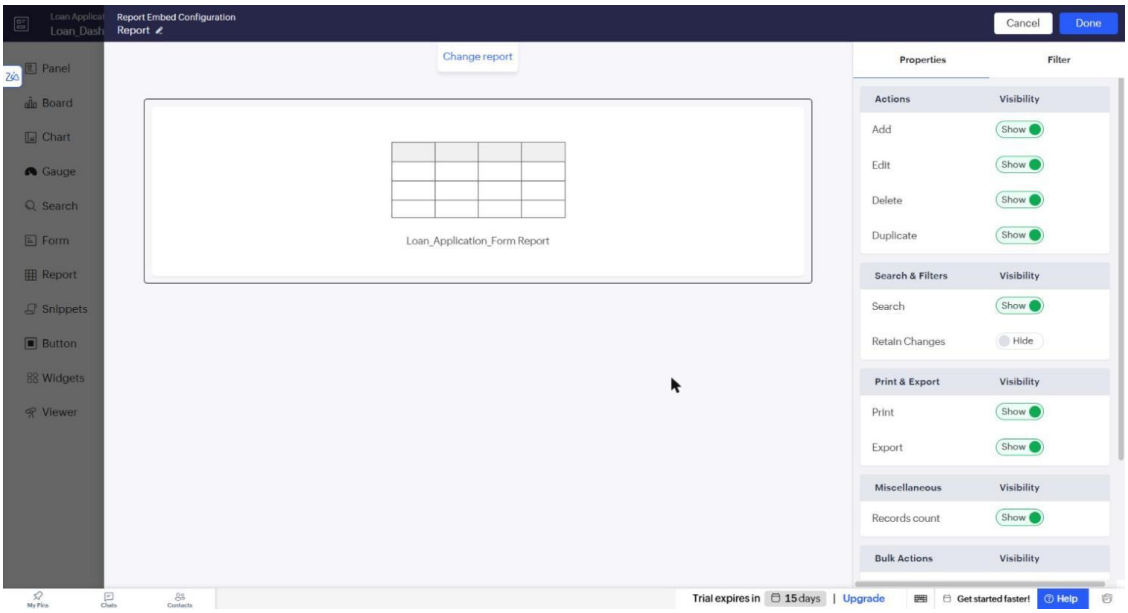

Figure 6: Report embed configuration

7. The page now holds the chart and the embedded report (Figure 7).

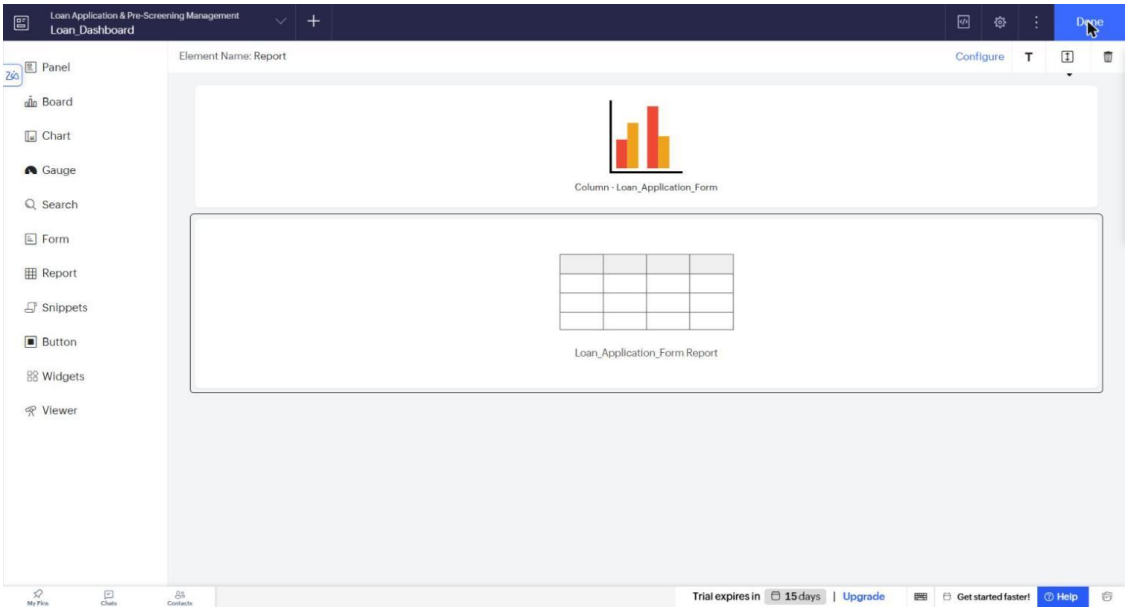

Figure 7: Page with chart and report

8. Click **Done** on the page builder. The page opens in the design view of the application under the name Loan_Dashboard (Figure 8).

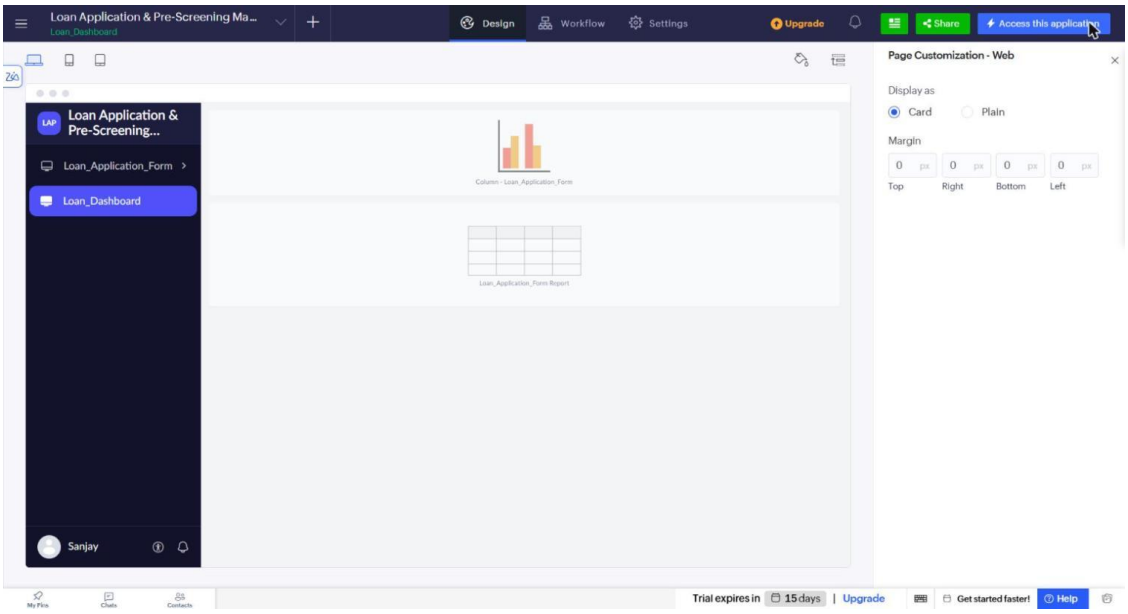

Figure 8: Loan_Dashboard in the design view

9. Open Loan_Application_Form Report in the report builder. Under User Options, click **Quick Filters**, choose the field **Loan_Type** and click **Add** (Figure 9). Click **Done**.

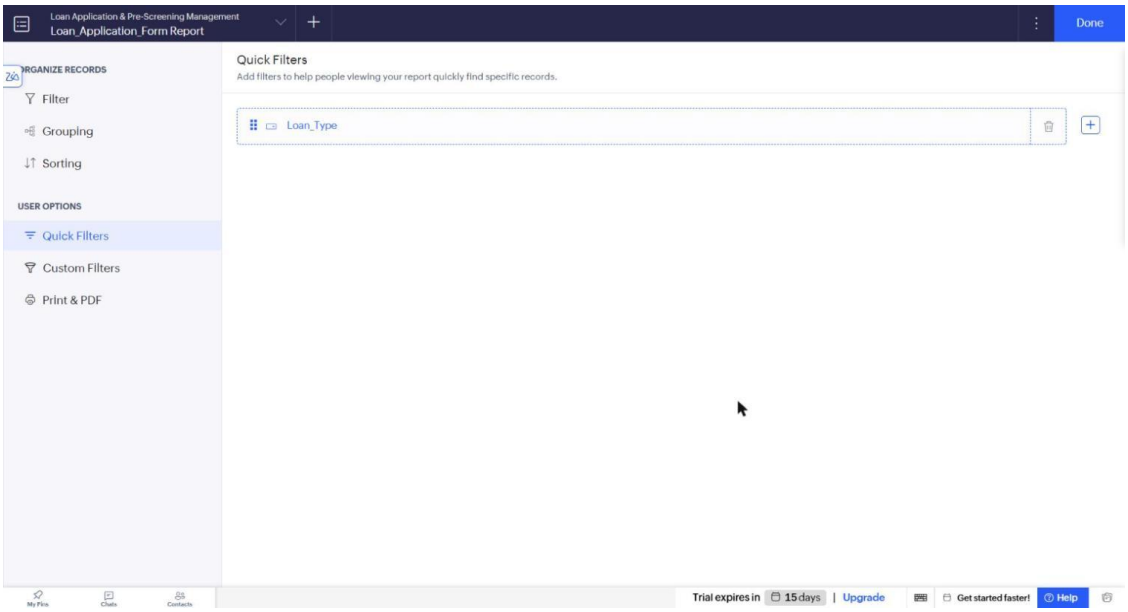

Figure 9: Quick filter added to the report

10. The report design view now shows the Loan_Type filter above the table (Figure 10).

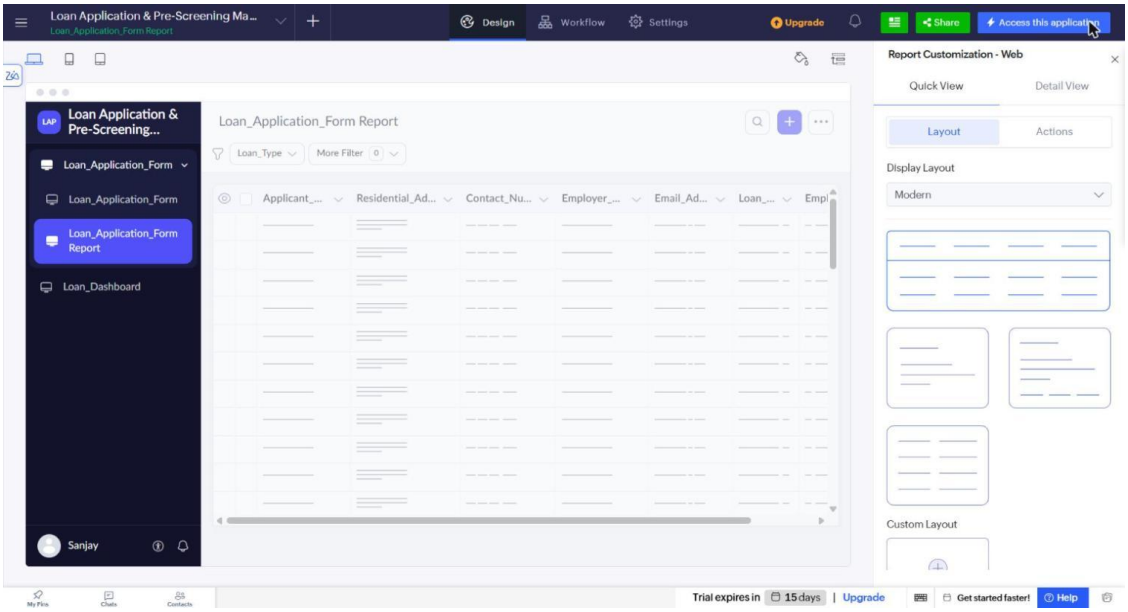

Figure 10: Report with the quick filter

Result

A page named Loan_Dashboard was created in the application. It contains a column chart of Loan_Application_Form (count of Contact_Number for each Loan_Type) and the embedded Loan_Application_Form Report. A quick filter on Loan_Type was added to the report. The page, chart and report were checked in the design view of the builder. No application record was submitted, so the chart and report were not viewed with data.
