EXPERIMENT 4

Data Modelling and Form Design for a Business Application in Zoho Creator

Application: Loan Application & Pre-Screening Management

Aim

To create a data model and to design a loan application form named Loan_Application_Form in Zoho Creator, using all 13 Basic Field types, for the Loan Application & Pre-Screening Management application.

Procedure

Part A: Data Modelling

A1. List the information the application must store. It is grouped as follows:

- Applicant details: name, residential address and contact number.
- Contact and employment: email address and employer name.
- Loan and income: loan type, employment type, documents available and monthly income.
- Callback and consent: preferred callback date and time, remarks and consent for a credit check.

A2. Give each item a field name and a field type. All of these are kept in one form, Loan_Application_Form:

- Applicant_Name – Name
- Residential_Address – Address
- Contact_Number – Phone
- Employer_Name – Single Line
- Email_Address – Email
- Loan_Type – Drop Down
- Employment_Type – Radio
- Documents_Available – Multi Select
- Monthly_Income – Number
- Preferred_Callback_Date – Date
- Preferred_Callback_Time – Time
- Remarks – Multi Line
- Consent – Checkbox

A3. Sign in to Zoho Creator, open the application **Loan Application & Pre-Screening Management**, and click the + button to create a new form. The dialog asking how to create the form is shown in Figure 1.

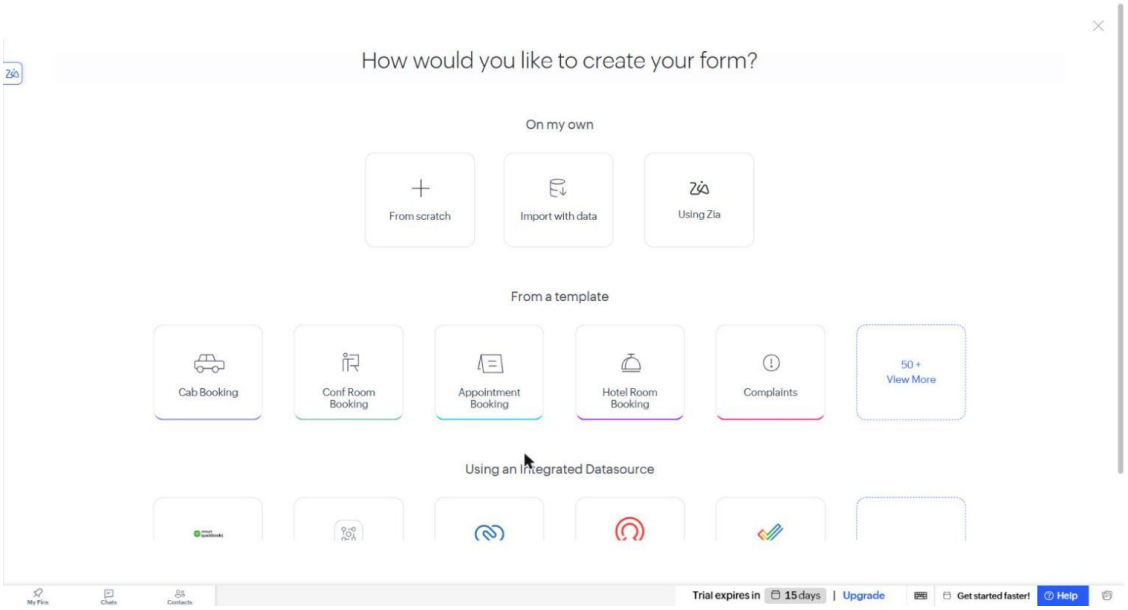

Figure 1: Options for creating the form

A4. Select **From scratch**. In **Name form**, type **Loan_Application_Form** and click **Create Form**. The form builder opens.

Part B: Form Design

B1. The form builder opens with the Basic Fields list on the left and an empty form area in the centre (Figure 2).

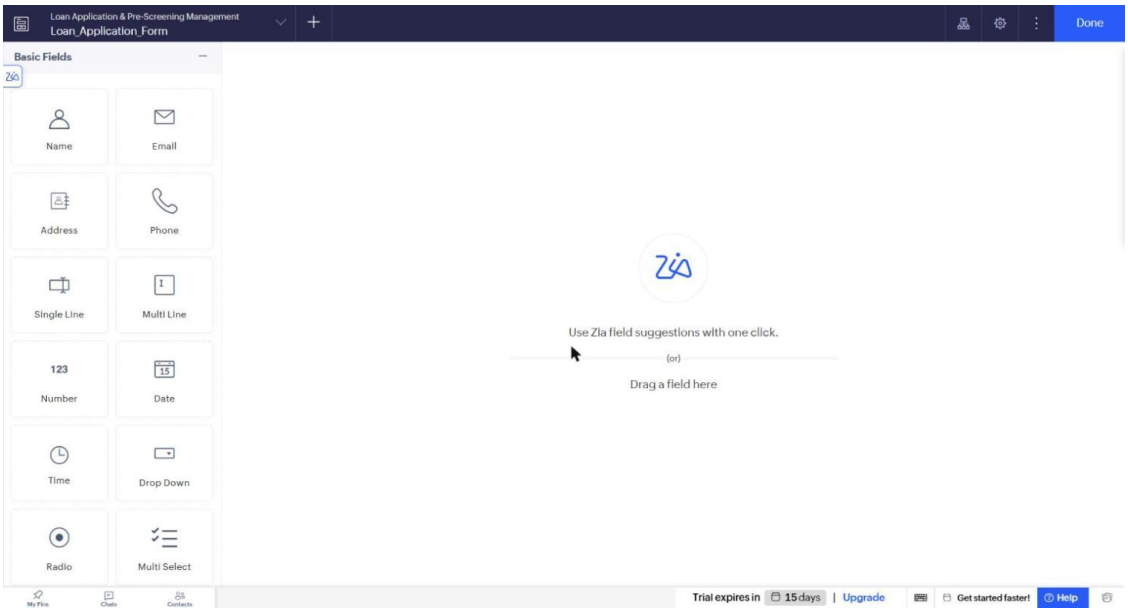

Figure 2: Blank form builder with the Basic Fields list

B2. Drag the **Name** field onto the form area. The Field Properties panel opens on the right. In **Field name**, type **Applicant_Name** and tick **Mandatory**. A red star appears next to the field (Figure 3).

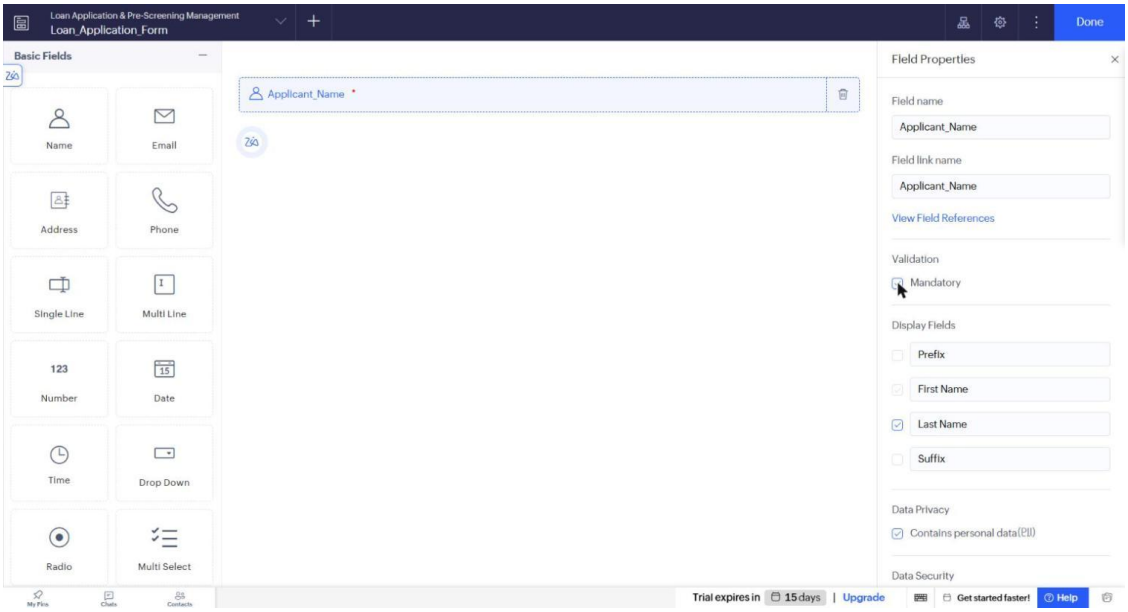

Figure 3: Field renamed to Applicant_Name and made mandatory

B3. Drag **Address** onto the form and name it **Residential_Address**. The option **Capture geo coordinates** is ticked in Address Options (Figure 4).

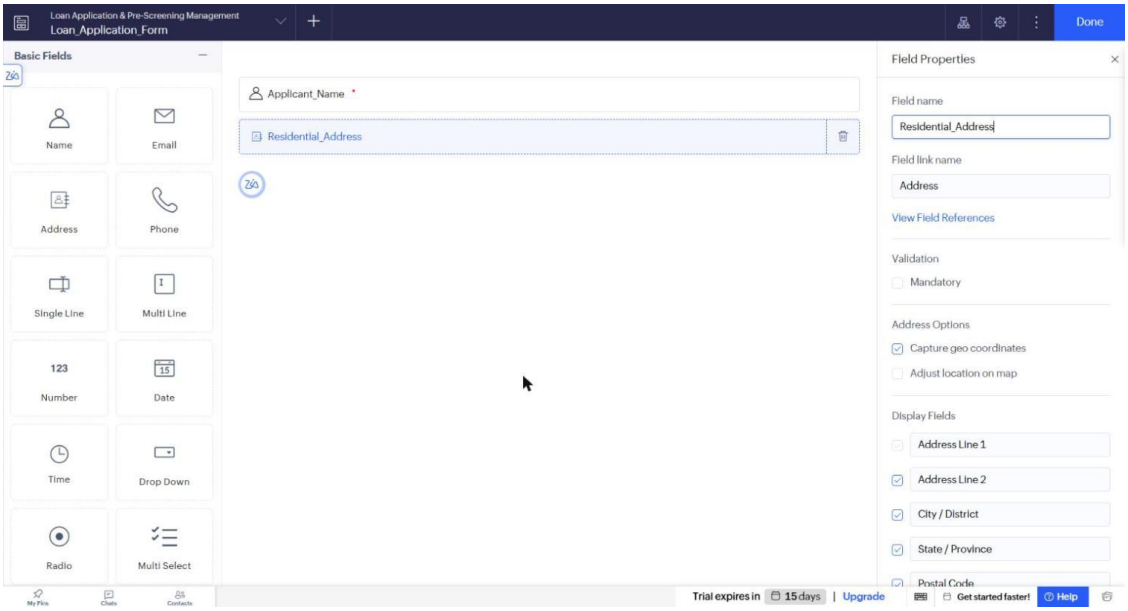

Figure 4: Residential_Address with Capture geo coordinates ticked

B4. Drag **Phone** onto the form and name it **Contact_Number**. Tick **Mandatory** (Figure 5).

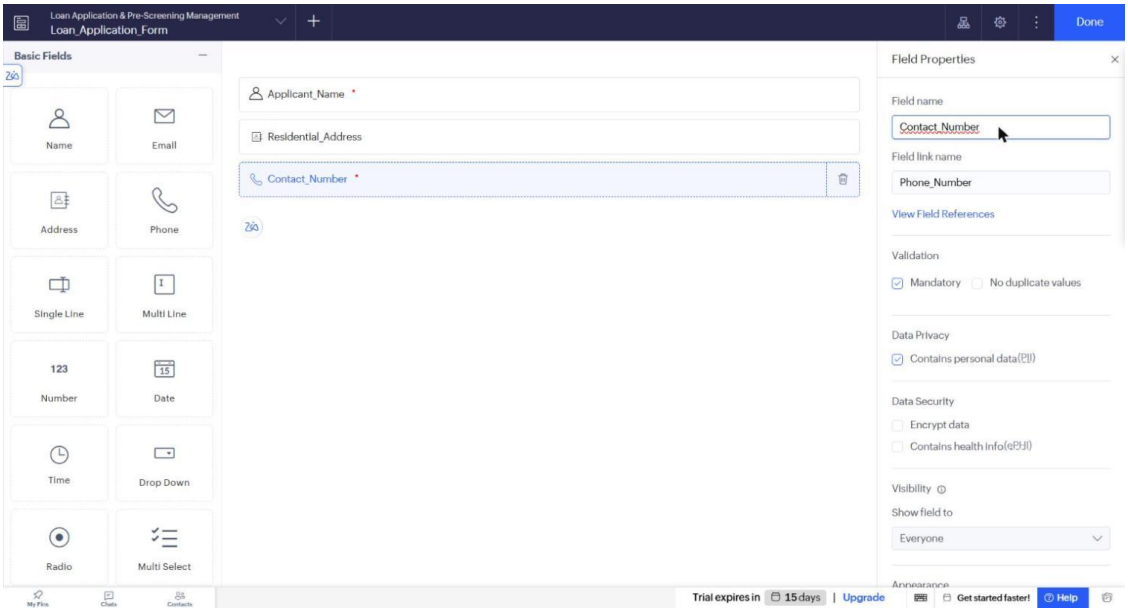

Figure 5: Contact_Number added and made mandatory

B5. Scroll down in Field Properties, click **Default country code**, search for India, select it and click **Configure**. The box now shows India (Figure 6).

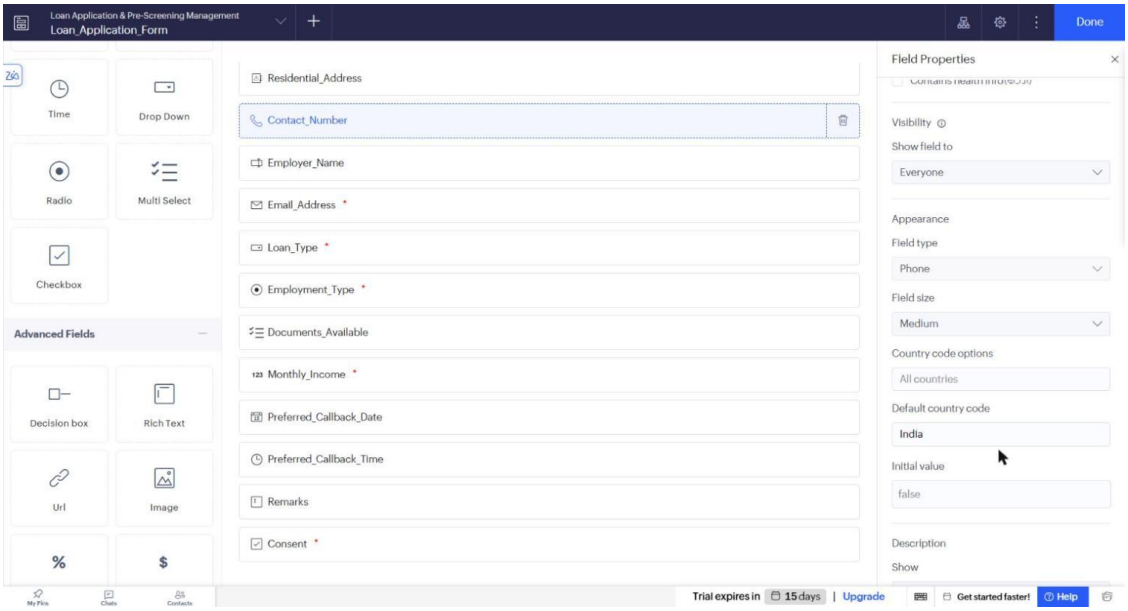

Figure 6: Contact_Number with India as the default country code

B6. Drag **Single Line** onto the form and name it **Employer_Name**. Drag **Email** onto the form, name it **Email_Address** and tick **Mandatory**.

B7. Drag **Drop Down** onto the form and name it **Loan_Type**. Replace the three default choices with **Home Loan**, **Personal Loan** and **Vehicle Loan**, and tick **Mandatory** (Figure 7).

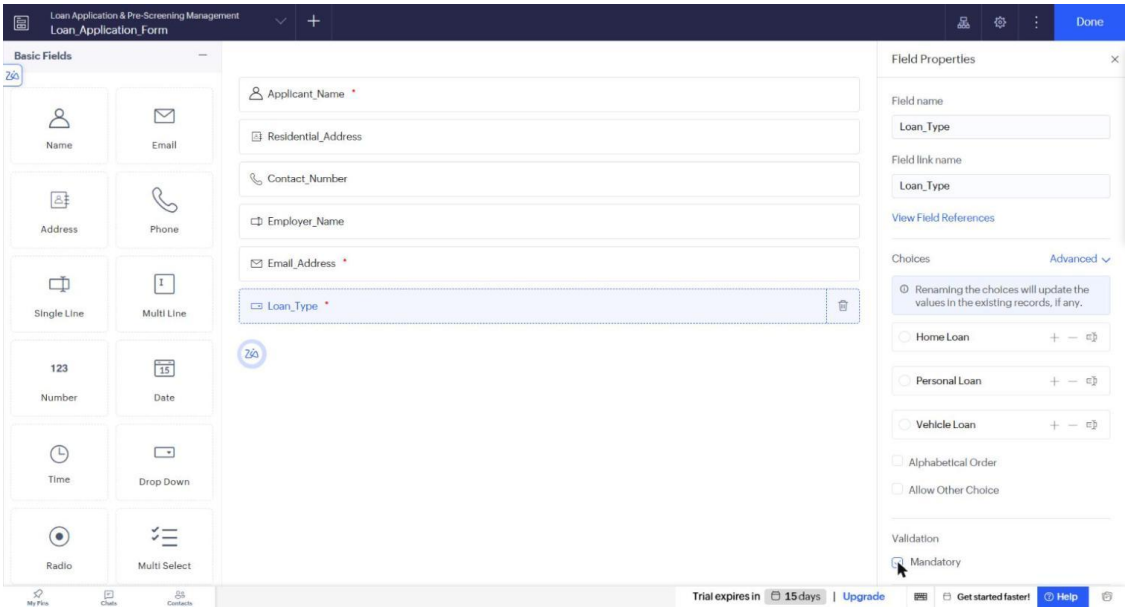

Figure 7: Loan_Type drop-down choices

B8. Drag **Radio** onto the form and name it **Employment_Type**. Enter the choices **Salaried** and **Self-Employed**, delete the third default choice with the − button, and tick **Mandatory** (Figure 8).

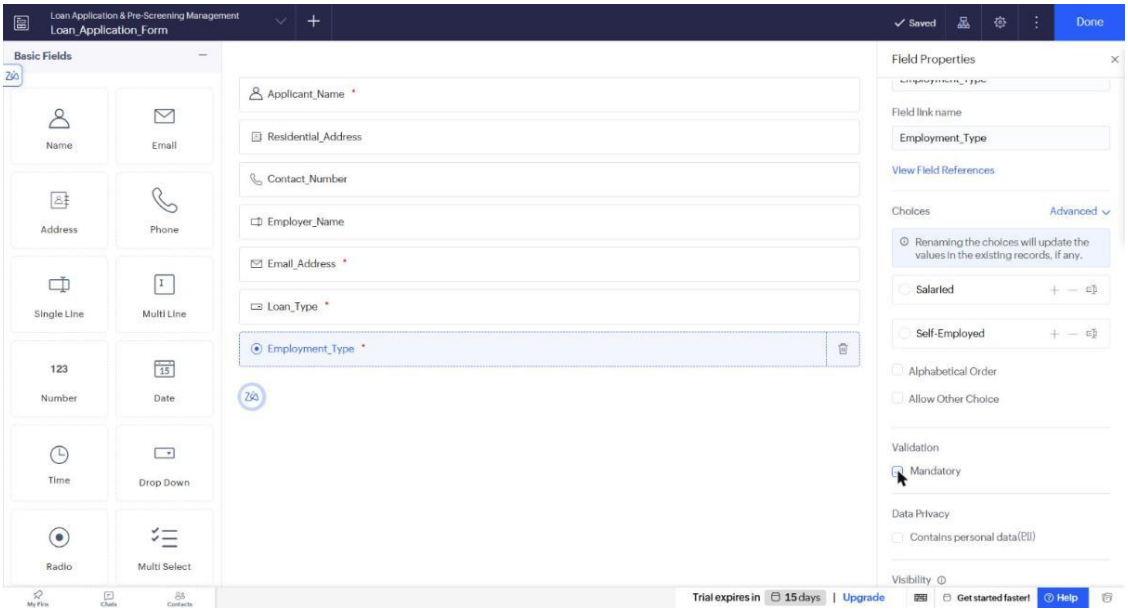

Figure 8: Employment_Type radio choices

B9. Drag **Multi Select** onto the form and name it **Documents_Available**. Enter the choices **ID Proof**, **Address Proof** and **Income Proof**.

B10. Drag **Number** onto the form and name it **Monthly_Income**. Tick **Mandatory**. The field only offers a Max Digits setting, which was left at 10 (Figure 9).

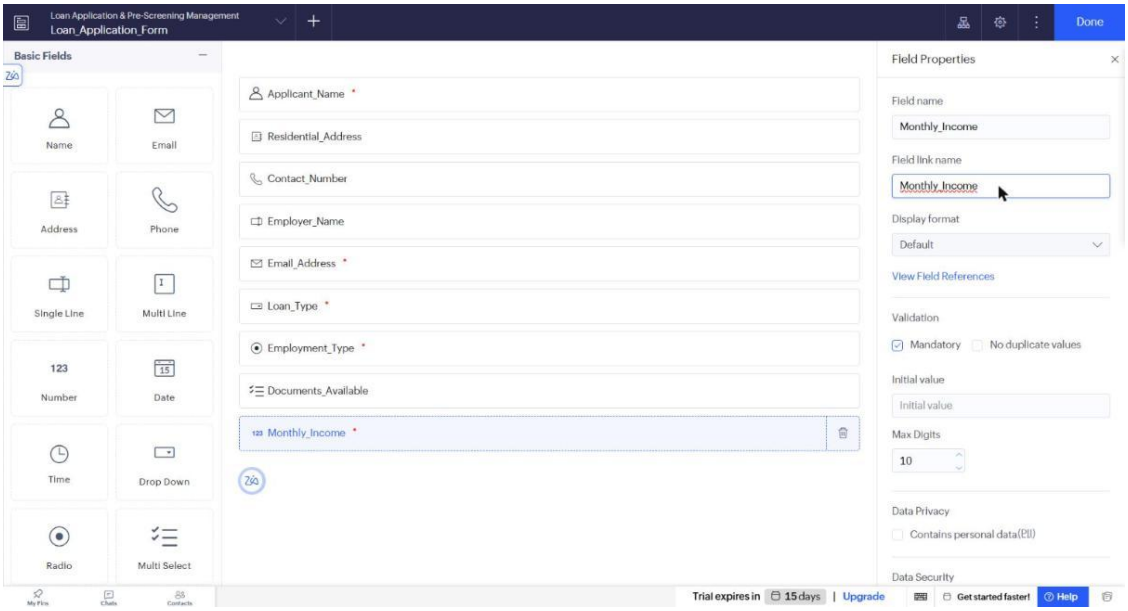

Figure 9: Monthly_Income number field

B11. Drag **Date** onto the form and name it **Preferred_Callback_Date**. Its properties offer only Initial value and Allowed Days (Figure 10).

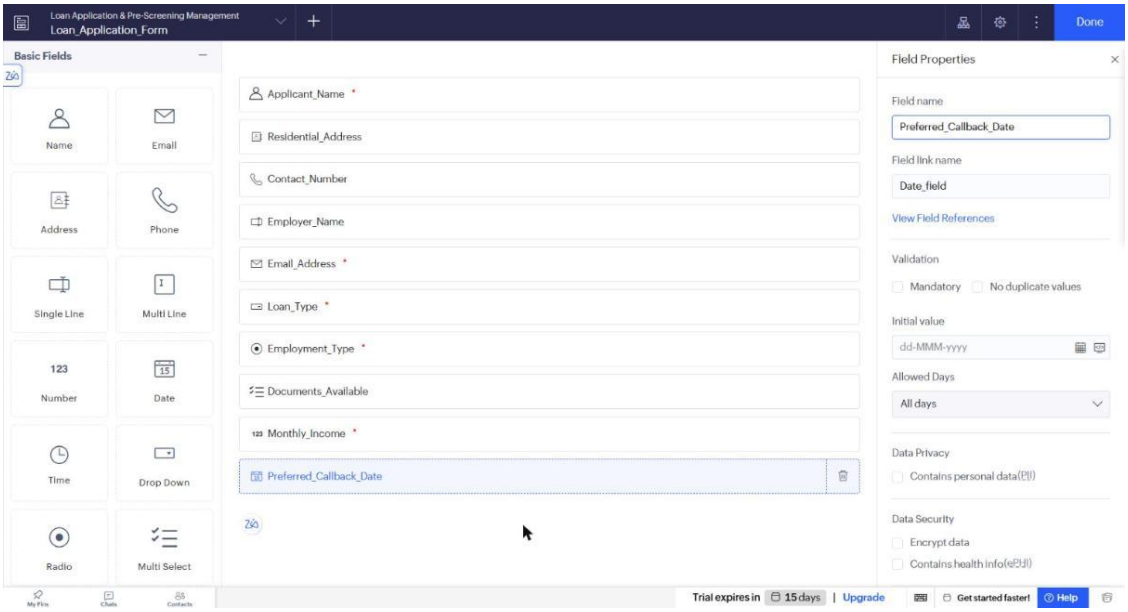

Figure 10: Preferred_Callback_Date properties

B12. Drag **Time** onto the form and name it **Preferred_Callback_Time**. Drag **Multi Line** onto the form and name it **Remarks**.

B13. Scroll down in the Basic Fields list. Drag **Checkbox** onto the form and name it **Consent**. Delete the two extra choices with the − button, change the remaining choice to **I agree to a credit check**, and tick **Mandatory** (Figure 11).

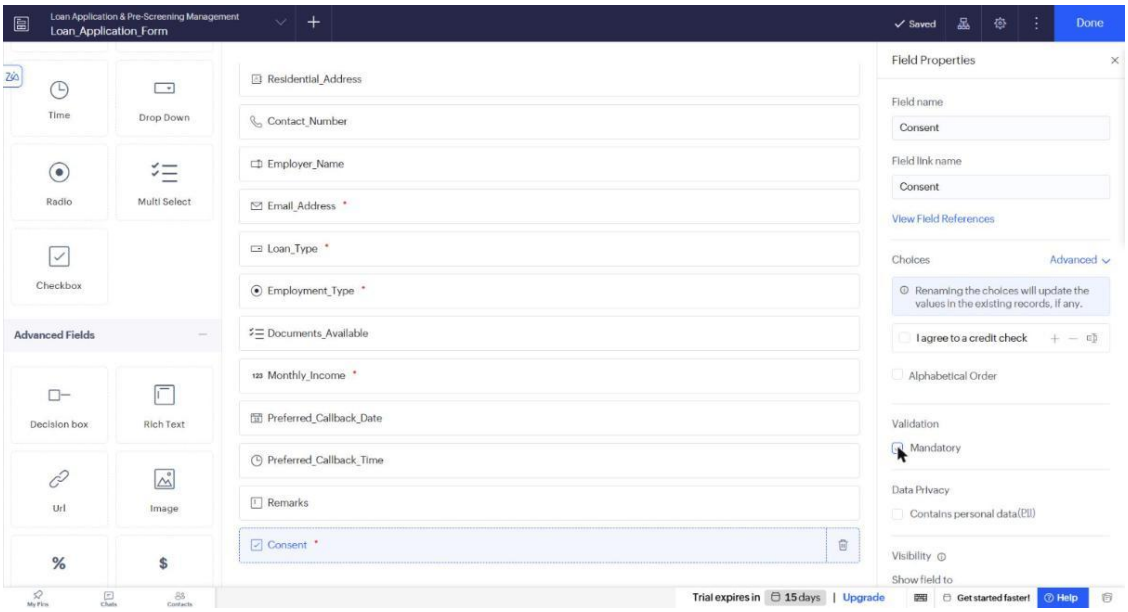

Figure 11: Consent checkbox with Mandatory ticked

B14. Scroll to the top of the form area to check all fields. The builder shows the 13 fields (Figure 12).

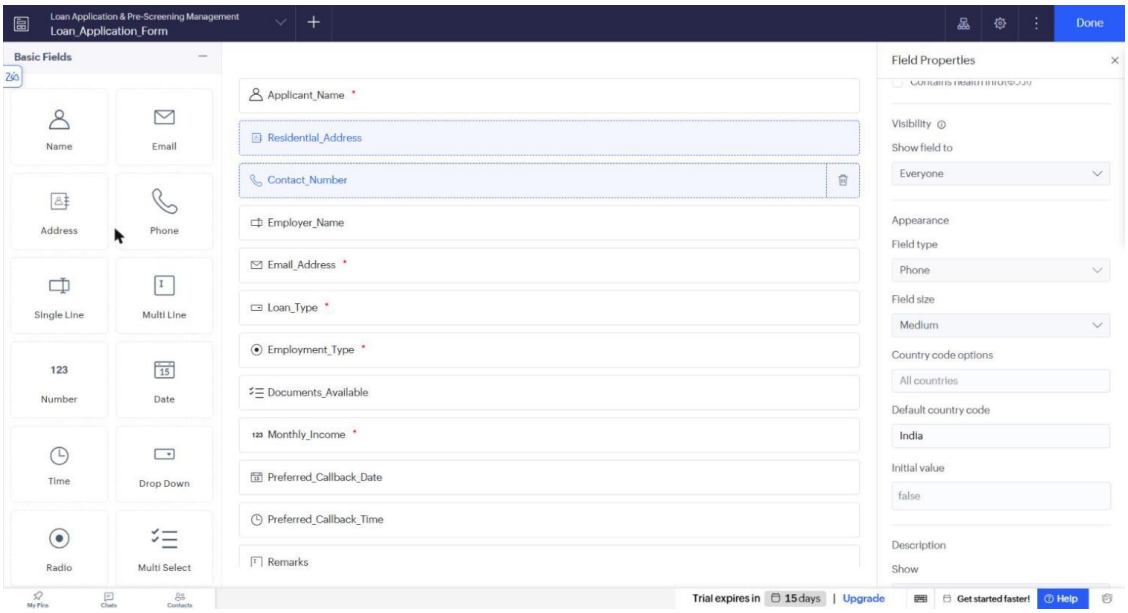

Figure 12: Form builder showing the fields

B15. Click **Done**. The form design view opens and shows the form with its fields, including the +91 country code on Contact_Number (Figure 13). No record was submitted.

Result

The form Loan_Application_Form was created in the Loan Application & Pre-Screening Management application with all 13 Basic Field types: Name, Address, Phone, Email, Single Line, Drop Down, Radio, Multi Select, Number, Date, Time, Multi Line and Checkbox. Applicant_Name, Contact_Number, Email_Address, Loan_Type, Employment_Type, Monthly_Income and Consent were set as mandatory, geo coordinates were enabled on Residential_Address, and the default country code of Contact_Number was set to India (+91). Zoho Creator created a default report for the form.

Only Max Digits is available for Monthly_Income, and only Initial value and Allowed Days for Preferred_Callback_Date, so no minimum value or past-date rule could be set in the field properties. Sections were not created, and the form was not submitted or tested with data.
