EXPERIMENT 12

Implementing Security Features and Governance and Administration Practices in Zoho Creator

Application: Loan Application & Pre-Screening Management

Aim

To view and use the security, governance and administration features available for the Loan Application & Pre-Screening Management application in Zoho Creator.

Procedure

1. Sign in to Zoho Creator. In the left menu of the home page, click **Operations**. Take a screenshot of the page that lists Backup, Audit Trail, Domain Restriction, API Management, Logs and the other options. (Figure 1)

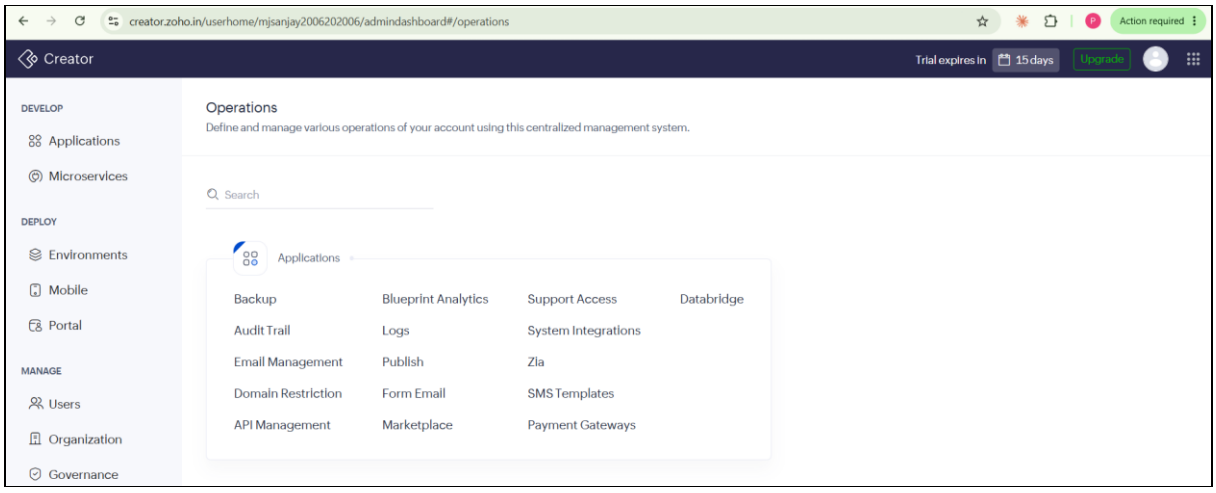

Figure 1: Operations page

2. Click **Audit Trail**. Click **Select Application** and choose **Loan Application & Pre-Screening Management**. Select the form **Loan_Application_Form**. Take a screenshot. (Figure 2)

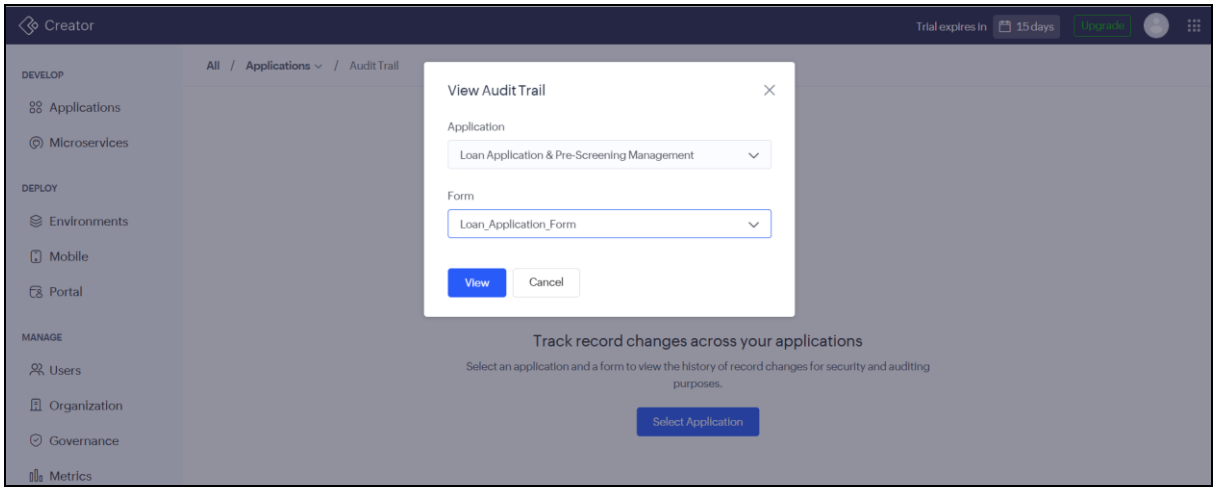

Figure 2: Audit Trail with the application and form selected

3. Go back to Operations and click **Domain Restriction**. Take a screenshot of the **User Domain Restriction** window with the application selected. Click **Cancel** to close the window without changing anything. (Figure 3)

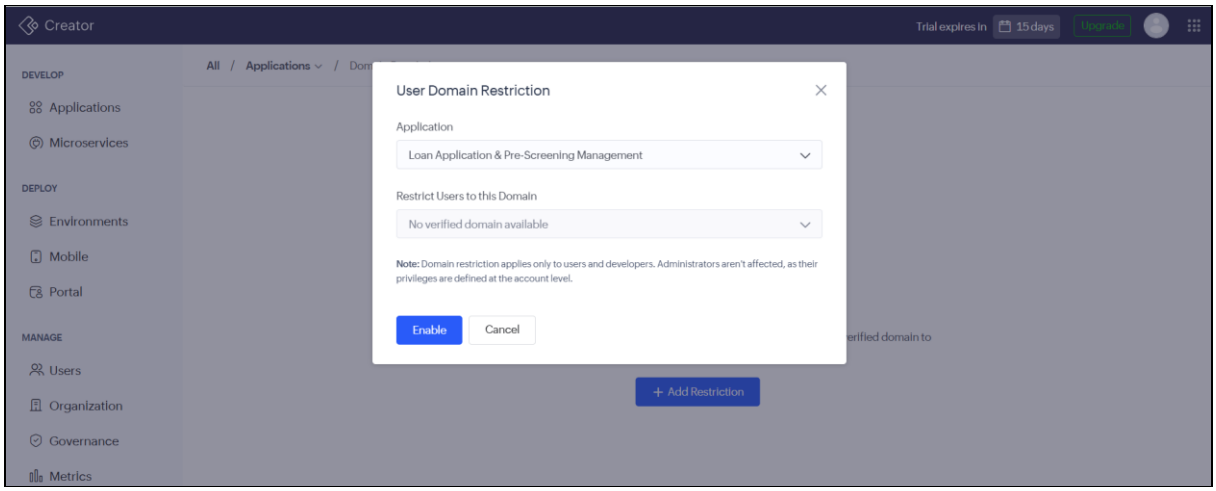

Figure 3: User Domain Restriction window

4. In the left menu click **Governance**. Take a screenshot of the page. (Figure 4)

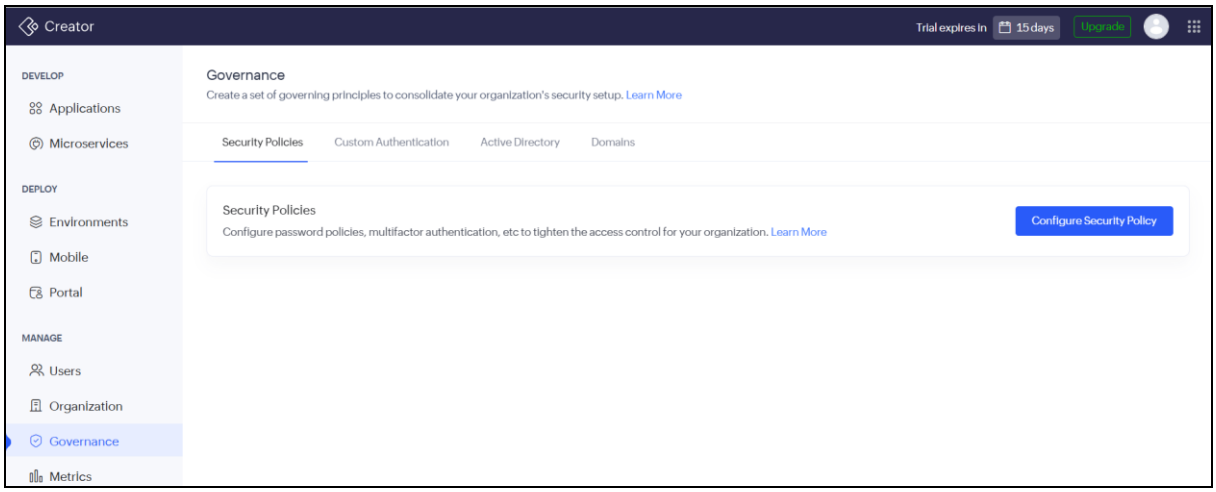

Figure 4: Governance page

5. Open the application in the builder, click the **Settings** tab and click **User Permissions**. Take a screenshot of the page that shows the permissions and roles that control access to the application. (Figure 5)

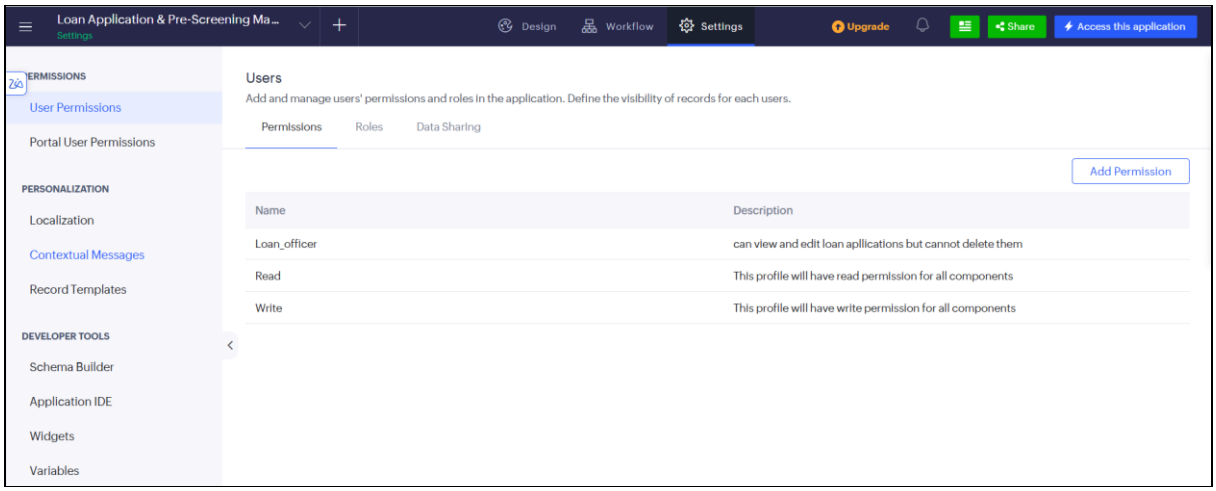

Figure 5: User Permissions page of the application

Result

The Operations page, Audit Trail, Domain Restriction, Governance and the User Permissions page of the application were opened and checked. The Audit Trail was opened for the form Loan_Application_Form of the application. No setting was changed.
